Installation of wallcoverings

HP latex inks

There are many ways to install a wallcovering on the wall!

Installation of wallcoverings

HP latex inks

There are many ways to install a wallcovering on the wall!

- 1.- With glue**
- 2.- With water**
- 3.- Self-adhesive**
- 4.- Magnetic**

1.- Installation with glue

HP latex inks

Wall-adhesion technique – use Henkel Methylan Direkt for non-woven ones

2.- Installation with water

HP latex inks

HP PVC-free wall paper: pre-pasted!

3.- Installation with a self-adhesive

HP latex inks

Decoprint Diamond: easy to install, easy to remove!

4.- Installation of a magnetic wall covering

HP latex inks

A magnet sheet is needed

4.- Installation of a magnetic wall covering

HP latex inks

The magnet is adhered to the wall

4.- Installation of a magnetic wall covering

HP latex inks

The print is rolled onto the magnet

4.- Installation of a magnetic wall covering

HP latex inks

The print is rolled onto the magnet

4.- Installation of a magnetic wall covering

HP latex inks

Very easy to install...

4.- Installation of a magnetic wall covering

HP latex inks

...and very easy to replace!

4.- Installation of a magnetic wall covering

HP latex inks

...and very easy to replace!

4.- Installation of a magnetic wall covering

HP latex inks

...and very easy to replace!

4.- Installation of a magnetic wall covering

HP latex inks

We can add one layer to the print!

4.- Installation of a magnetic wall covering

HP latex inks

We can add several layers to the print!

Vehicle wrapping with cast vinyls

Turn a standard vehicle...

...into a personalized one, wrapped with a printed vinyl!

Vehicle wrapping is easier with HP latex technology!

From printing with solvent inks...

... to printing with HP latex inks

Lamination is important just after printing

HP latex inks

**But you need to wait...
if you print with solvent inks!!!**

...or send all solvent to the room!

Instant lamination with HP latex inks

Conformability

Latex inks are known for their flexibility

HP latex inks

HP Latex does not modify the vinyl, nor the adhesive!

Effect on the backside of a printed vinyl

HP latex technology to print on canvas?

1 Image Quality

2 Durability

HP latex technology to print on canvas?

Image Quality

Durability

No cracking, no lamination is needed

HP latex inks are flexible

No cracking thanks to the flexible HP latex inks

When combined with a flexible canvas

Other inks break when folding

Other inks break when folding

HP latex technology to print on canvas?

- 1 Image Quality
- 2 Durability
- 3 No cracking, no lamination is needed
- 4 **Lower cost canvas**

Stretched canvas: a product with high margins!

Let's stretch a canvas...

HP latex inks

...with very simple tools

HP latex inks

Prepare the stretching bars

HP latex inks

Assemble the stretching bars

HP latex inks

Make the wooden frame

HP latex inks

Ensure 90° angles

HP latex inks

The wooden frame is ready!

HP latex inks

Position the frame on top of the canvas

HP latex inks

Start the stretching process

HP latex inks

First one side, then the other...

Fold the corners...

HP latex inks

...with no cracking!

HP latex inks

Add more staples

HP latex inks

Embellish the backside

HP latex inks

Professional finish!

HP latex inks

Insert the wedges

HP latex inks

Hit the wedges to obtain additional tension

HP latex inks

An alternative tensioning method: artwedge.com

The canvas is ready!

HP latex inks

The canvas is ready!

HP latex inks

Add texture to the canvas

HP latex inks

Water-base texturing gel / texturizer

The gel becomes transparent once dried

HP latex inks

You may want to embellish the print...

HP latex inks

...with just some retouches here and there!

HP latex inks

Canvas with high margins!

HP latex inks
